

Pecha Kucha 12 x 20 PowerPoint Presentation

Your assignment is to make a Powerpoint Presentation that educates your classmates and also is interesting. Rules: 12 slides, 20 seconds per slide, on average (that's 4 minutes for your entire presentation). You will be timed. You should practice to make sure you can present in the given time. Presentations must be shared with your classmates via the Google Docs - provide a link to your Powerpoint on this document, under your disease topic.

You must decide what is important in terms of *what* goes on your PowerPoint - the only requirement is that you incorporate how technology can be used to diagnose, treat or cure this disease. Rule of thumb: more pictures, fewer words.

Diseases of the Skin

1. Cold Sores (Fever Blisters) - Lily
